Washington, DC

The Urban Initiative for Reproductive Health is a program of the National Institute for Reproductive Health (National Institute).

The National Institute is an innovation institute for state and local organizations working on reproductive health issues. We offer strategic guidance, hands-on support and funding to help state and local leaders remove barriers to health care, win public battles and change public policies. Together, we are helping women in communities across the country gain access to the full range of quality reproductive health care options, the freedom to exercise their reproductive rights and the opportunity to have healthy pregnancies.
